4H MODE

The ideal mode for most driving, 4H mode offers smooth, quiet on-road performance plus off-road traction.

4H LOCK
In rough terrain or slippery conditions this high-range 4×4 mode evenly distributes traction to front and rear wheels. It’s ideal for powering through deep snow or mud.

4L LOCK
With a transfer gear ratio nearly twice that of 4H Lock, this low-range 4×4 mode gives you the low-end torque and traction you need in extreme off-road situations.

INDEPENDENT SUSPENSION

The built-in ladder frame integrates with the monocoque body to increase rigidity and durability without adding to overall weight. This lightweight, one-piece body also reduces overall and floor heights, increasing cabin space despite its high ground clearance. Adding in the fully independent suspension further enhances resistance to twisting and flexing while contributing to linear handling response for smoother on-road cruising and impressive off-road traction. The bottom line for driver and passengers alike is the freedom to go where you will and the stability to enjoy every minute of it.
