

FRONX

Everyday exceptional

Discover the moment where extraordinary meets simplicity — again and again. Drive the all-new Suzuki Fronx, everything you want in a versatile crossover-SUV and more. Featuring more tech than you can imagine and an advanced safety suite, this efficient self-charging Smart Hybrid is next level inside and out.

You want it? Fronx got it!

- TWO TONE

 - Opulent Red Pearl Metallic with Bluish Black Pearl (E86)
 - Lucent Orange Pearl Metallic with Bluish Black Pearl (E88)
 - Splendid Silver Pearl Metallic with Bluish Black Pearl (E85)
 - Celestial Blue Pearl Metallic (WBH)
 - Bluish Black Pearl (WB3)
 - Grandeur Grey Pearl Metallic (WBF)
 - Arctic White Pearl (ZHU)

Your interior motive

For the perfect fusion of futuristic tech and on-road innovation, look no further than the new Fronx. Primed with integrated technology, let your senses be awakened for an unparalleled driving experience. Indulge yourself with every little comfort on offer with its plush dual-tone interior, refined design, and refreshing sense of spaciousness.

Smart. Safe. Sure!

Fronx by name, forward-thinking by design. Drive with confidence and enjoy superb all-round visibility, effortless manoeuvrability, and an array of advanced safety technology. Embrace your fearless spirit and shape your own adventure today.

CLIMATE CONTROL AIR CONDITIONING
Whatever the season, adjust your comfort level with the digital climate control air conditioning and breathe a little easier with the pollen filter.

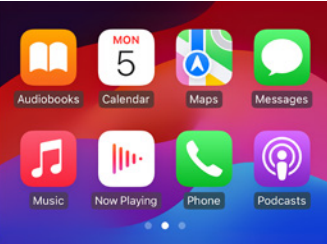

HEATED FRONT SEATS AND A DREAM RIDE
For elevated comfort on cooler days, dial up the warmth with individually controlled heated front seats. Enjoy all the comforts of the new Fronx's cleverly designed cabin, with adjustable steering wheel, keyless entry and push-button start, handy storage, expansive head and leg-room and flexible roomy luggage space.

ELECTRIC PARKING BRAKE
With the flip of a switch the parking brake is activated. When shifting and accelerating, it releases automatically for smooth starting. The brake hold function temporarily keeps the Fronx stationary.

HEADS-UP DISPLAY (HUD)
The Fronx projects information, such as speed, warnings, and navigation guidance onto the HUD display in front of the driver's seat. This reduces line of sight movement, supporting safe driving.

INFOTAINMENT
The 9-inch touchscreen displays all your digital connectivity needs, including fuel consumption, hybrid energy flow, wireless Android Auto and Apple CarPlay, and smartphone connected navigation.

WIRELESS CHARGER & USB PORTS
Keep your smartphone charged on your journey with the centrally located Qi wireless charger, or USB ports located in the front console and behind the centre armrest.

360° AND REVERSE CAMERA
Get all-around bird's eye and 3D views of your Fronx thanks to four external cameras. Avoid surprises with the reverse camera, providing you with a clear picture of what's behind as you reverse without the need to twist in your seat.

DUAL SENSOR BRAKE SUPPORT II (DSBS)
DSBS employs a monocular camera and millimetre-wave radar to detect mid-to-long distances and pedestrians, as well as short distances and nighttime driving. These sensors collaborate to identify potential collisions and respond appropriately.

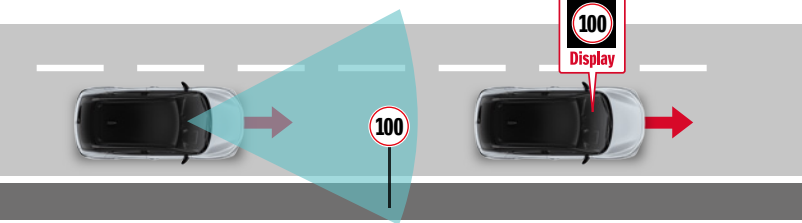

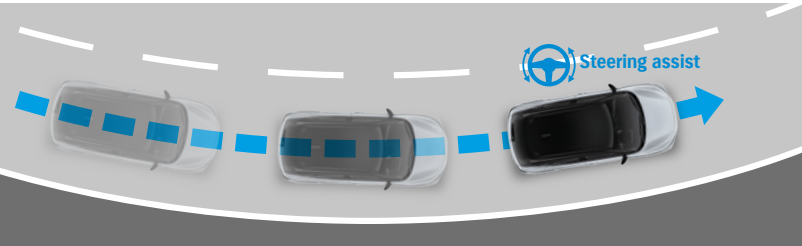

LANE KEEP ASSIST
When adaptive cruise control is activated, Lane Keep Assist helps maintain the vehicle's position in the centre of the lane. If it senses that an adjacent vehicle or structure is too close, it provides steering assistance to help maintain a safe distance.

LANE DEPARTURE WARNING AND PREVENTION
Stay securely in your lane with the Fronx's lane departure system. At speeds of 60 km/h or more, the monocular camera detects lane markers. If you drift, it vibrates the steering wheel, provides a visual warning, and can steer you back into your lane.

WEAVING ALERT
The weaving alert system monitors your driving patterns. If it detects wandering, often caused by driver fatigue, it issues both audio and visual warnings to help you stay focused.

ADAPTIVE CRUISE CONTROL
The adaptive cruise control utilises millimetre-wave radar to maintain a set following distance automatically, adjusting based on your selected setting and vehicle speed. The stop & go function brings the car to a full stop when needed.

PARKING SENSORS
Parking is made easier and safer with ultrasonic sensors at the front and rear. These sensors detect obstacles and provide both visible and audible warnings to assist you.

TRAFFIC SIGN RECOGNITION
Stay informed with traffic sign recognition. This system detects and displays traffic signs on the multi-information display, helping you stay aware of speed limits and other important information.

REAR CROSS TRAFFIC ALERT
When reversing at speeds up to 8 km/h, rear-mounted side radar sensors alert you to approaching vehicles from either side, giving both visual and audio warnings to enhance safety.

BLIND SPOT MONITOR
Lane changes are safer with the Fronx's blind spot monitor. At speeds above 15 km/h, rear-mounted radar sensors detect vehicles in or approaching your blind spots, illuminating a warning LED in the exterior mirror and providing additional alerts if you signal a lane change.

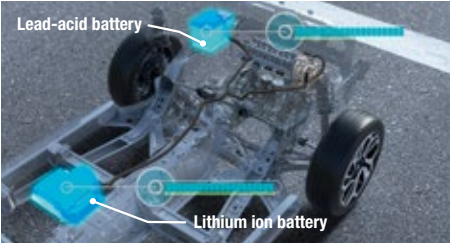

6 AIRBAGS
Feel safe and secure with six airbags strategically placed to protect you and your passengers. This includes front, side, and curtain airbags, providing comprehensive coverage in the event of a collision.

* Please do not rely on the Advanced Forward Detection System. It is only an aid and the ability to detect obstacles and lanes, and control the vehicle is limited. Always drive safely.

Born to outperform

Simply sublime, the new 6-stage auto Fronx is on point — delivering power-packed performance and efficiency for all your urban or out-of-town adventures. Powered with the latest Smart Hybrid self-charging technology, this sporty compact SUV takes you further than you’ve ever been before.

ENGINE AUTO STOP
As the Fronx comes to a stop, the engine will stop and the ISG will power all the electrics, saving fuel. Once the accelerator is pressed, the ISG functions as a starter motor to silently and smoothly restart the engine.

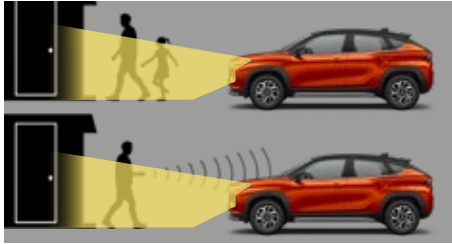

ENGINE ASSIST
When the Fronx accelerates, the ISG assists the engine, reducing the fuel consumption and lowering CO₂ emissions.

SELF CHARGING BATTERY
The Fronx’s ISG uses deceleration and braking energy to efficiently recharge the Fronx’s lithium ion battery, so there’s no need to worry about plugging in.

LED LIGHTING SYSTEM
The Fronx’s auto light-sensing LED multi-reflector headlamps automatically turn on with nightfall or low light. High beam assist turns your headlamps down when oncoming traffic approaches or the street lights are sufficient. The LED daytime running lamps keep you visible while easing electrical usage.

GUIDE ME LIGHT
When you turn off your Fronx, the headlamps continue to illuminate the road for a short while after you get out. When the doors are unlocked with the remote, the headlamps turn on to lead you to the vehicle.

6-STAGE AUTO & SPORT MODE
The Fronx’s 6-stage automatic provides optimum acceleration and high speed efficiency. Paddle shifters enable manual gear changing to maximise the driving experience. While turning on sport mode allocates torque to improve cornering performance and driving uphill.

Specifications

INFOTAINMENT		AUTO
Touchscreen		●
Six speaker tuner/MP3/WMA		●
Bluetooth® and USB input		●
Wireless Android Auto™ and Apple CarPlay®		●
Smartphone connected navigation		●
Wireless Qi charging pad		●
